

GUIDE

You are new to TV and FM Radio monitoring without existing recording equipment?

1. Decide how many TV and FM Radio channels you need to monitor.

1 SAIL LABS Feedexer™ 2x2 enables you to accept input from 2 analog free-to-air SAT channels

(all FM Radio channels and some terrestrial TV stations are analog).

1 SAIL LABS Feedexer™ 4x4 enables you to accept input from 4 digital free-to-air SAT TV channels.

→ In order to monitor 8 digital free-to-air SAT TV channels, 2 Feedexer™ 4x4 are required.

2. Decide which languages you need.

You can currently choose between English, German, French and Spanish.

3. Decide how many keywords you need to find.

You can currently choose between up to 50, 100, 200 or 500 keywords.

4. Decide on which Computer you will use the KeyWord Finder.

The KeyWord Finder License is registered to one computer only and cannot be changed during an active license period. When using the SAIL LABS Feedexer™ recording equipment the KeyWord Finder runs on them directly.

5. Choose your KeyWord Set.

The KeyWord Set is the list of key words which the KeyWord Finder will find for you. Any word can be chosen. Note: every word form is an own word (such as "bank" and "banks"). Proper names consisting of multiple words, count as one (such as "New York")

Now you are ready to move directly to the SAIL LABS Shop, to select the KeyWord Finder features (language, number of keywords), to submit your KeyWord Set and Computer Information and to get started!

You are already equipped with media feeders and ready to media stream?

Move directly to the SAIL LABS Shop, select the KeyWord Finder features (language, number of keywords), submit your KeyWord Set and Computer Information and get started right away!

N.B.: The KeyWord Finder License is registered to one computer only. Registration happens by running CompID.exe when adding a product to the cart and cannot be changed during an active license period.
